Art Unit: 2625

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-30 are rejected under 35 U.S.C. 102(e) as being anticipated by Bugwadia et al (US Patent No. 6,229,570).

As per claims 1, 11 and 21, Bugwadia teaches an article comprising a medium for storing instructions that cause a processor-based system to: receive an indication of a selected portion of a first display frame of a sequence of video frames (column 3, lines 15-18); receive an indication of a selected portion of a second display frame of the sequence, the first and second display frames separated by intervening video frames (column 3, lines 15-18); and automatically interpolate a difference related to the selected portions of the first and second display frames over the intervening frames (column 5, line 10-column 6, line 14).

As per claims 2, 12, 22, Bugwadia teaches storing instructions that cause a processor-based system to automatically interpolate between the position of the selected portion of the first selected frame and the position of the selected portion of the second selected frame (column 5, line 10-column 6, line 14).

As per claims 3, 13, 23, Bugwadia teaches storing instructions that cause a processor-based system to automatically interpolate between the size of the selected

Application/Control Number: 09/531,043

Art Unit: 2625

portion of the first display frame and the size of the selected portion of the second display frame (column 3, lines 60-65).

As per claims 4, 14, 24, Bugwadia teaches storing instruction that cause a processor-based system to enlarge the selected portion of the first and the second display frames (column 9, line 65-column 10, line 3).

As per claims 5, 15, 25, Bugwadia teaches storing instructions that cause a processor-based system to create a series of thumbnail depictions of a sequence of video frames displayed together as a single display (figure 4).

As per claims 6, 16, 26, Bugwadia teaches storing instructions that cause a processor-based system to overlay an image of a window to create the indications of the selected portions (figure 4).

As per claims 7, 17, 27, Bugwadia teaches storing instructions that cause a processor-based system to automatically linearly interpolate a difference between the first and second display frames (column 3, lines 60-65).

As per claims 8, 18, 28, Bugwadia teaches storing instructions that cause a processor-based system to automatically create a panning effect between selected portion of d first display frame and the selected portion of the second display frame (column 3, lines 1-5).

As per claims 9, 19, 29, Bugwadia teaches storing instructions that cause a processor-based system to automatically create zoom effect between the selected portion of the first display frame and the selected portion of the second display frame (column 9, line 65-column 10, line 3).

Application/Control Number: 09/531,043

Art Unit: 2625

Page 4

As per claims 10, 20, 30, Bugwadia teaches storing instructions that cause a processor-based system to automatically create a panning effect between the selected portion of the first display and the selected portion of the second display frame (column 3, lines 1-5 and lines 50-65).

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Bender et al, Edelson et al and Szeliski et al are also cited.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Yon Couso whose telephone number is (703) 305-4779. The examiner can normally be reached on 8:00 am –4:30 pm from Monday to Friday

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Bhavesh Mehta, can be reached on (703) 308-5246. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9314.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 305-4700.
